Technical Skills

- Object-Oriented Programming: Java
- Web Application Development: HTML, CSS, JavaScript, Spring Boot, Vue.js, React
- Database Programming: JDBC, Table Design, SQL, PostgreSQL, E/R diagrams
- Development tools and techniques: Agile, Unit Testing (JUnit), Integration Testing, Git, IntelliJ, Test-Driven Development (TDD), Git, GitHub, Node.js, Docker, IDEA, Visual Studio Code

Technical Projects

BandMate 2.0 — Full Stack Developer

Technologies: Java, Spring Boot, PostgreSQL, Vue.js, RESTful APIs, HTML/CSS, VS Code, IntelliJ

- Designed and developed a social media platform for musicians to create profiles, connect, and form bands.
- Built RESTful APIs with Spring Boot and integrated them with a Vue.js front end to enable real-time data interaction.
- Implemented PostgreSQL database models to manage user profiles, instruments, and venues, improving data reliability and scalability.
- Enhanced user experience by simplifying profile creation and optimizing component reusability across multiple pages.

Marian Apparitions Website — Front-End Developer

Technologies: HTML, CSS, JavaScript, Vue.js

- Designed an educational website dedicated to Marian apparitions, highlighting key events through interactive visuals and timelines.
- Improved accessibility and readability with a clean, responsive interface that adapts to mobile and desktop users.
- Applied Vue.js components to dynamically render historical data, improving loading speed and user engagement.

Web Development Business — Founder & Web Developer -----webrouers.com-----

Technologies: JavaScript, HTML, CSS, Vue.js, GitHub Pages

- Building custom, responsive websites for individuals and small businesses, focusing on usability and visual appeal.
- Leveraging Vue.js to create modular and scalable front-end components that streamline development time.
- Managing all stages of development from client consultation to deployment, ensuring alignment with client goals and brand identity.

Professional Experience

Middle School Math and Science Teacher

Aug '21 - Present

Bastrop ISD

Bastrop, TX

- Enhanced student grades by 15%, student engagement by 20% by implementing real-life illustrations, interactive activities, and technology to enrich the learning experience using computer models and test scores
- Deploy cutting-edge teaching techniques leveraging online educational resources and Learning Management Systems to enhance the learning experience and information retention
- Applied strong problem-solving skills to tailor lessons for diverse learning styles and needs receiving positive feedback from supervisors and peers
- Led STEM clubs with hands-on experiments and engaging guest speakers, resulting in a 50% increase in participation and elevated science competition rankings technology, engineering, and mathematics

Science Teacher

Aug '17 - May '20

Dallas ISD

Dallas, TX

- Utilized interactive activities, multimedia resources, and various instruction methods achieving 30% improvement in reading comprehension, speaking fluency, and writing skills
- Fostered supportive learning environment, facilitating increased retention rates and enhanced student morale through personalized teaching approaches and engaging activities
- Utilized active participation in multicultural team projects to refine cross-cultural communication skills, elevating problem-solving capabilities and driving a 20% uptick in client satisfaction and retention

Education

Java Development Bootcamp

Mar '24 - Oct '24

Tech Elevator

Austin, TX

Full-stack bootcamp designing software systems and solutions with 800+ hours of education and application

BA Philosophy

The University of Texas at Austin

Austin, Texas
